- Average of 99% over three years of Drafting including one year of AutoCAD
- Physical Education Leadership program giving me training in Personal Leadership, Self evaluation, improvement, and motivation

Work Experience

ARCHITECTURAL DESIGNER - RENOVATIONS – SEPT '07 - PRESENT

Started in September '06 as the only/lead designer with a local award winning renovator. The company had purchased Revit but was not making use of it. As part of my employment I chose to integrate all future projects into Revit, including making needed changes as required, to drawings based in AutoCAD. As well as the Revit implementation, I have started to set up procedures, protocols, and tracking systems for the various jobs and responsibilities that I, and those around me, have.

Responsibilities:

- Development of conceptual & construction drawings, for client review in both 2D & 3D
- Creation and maintenance of files, communication, and drawing standards.
- General office duties including filing, documentation, and correspondence with customers, site supervisors, and the City of Calgary.
- Compilation and submission of applications to the City of Calgary, for both D.P. & B.P.
- Design and drawing of plans based on client 'wish list' and meetings with client.
- Responsible for development of Revit with in the office. Including standard components/templates and all other Revit based needs.

ARCHITECTURAL DESIGNER - ALBI HOMES LTD. - Jan '05 – Sept '07

Started in February '03 as a designer/draftsman in a quickly growing design/drafting department. Having Revit implementation skills already, I quickly developed a plan of action to update and educate the team I was working with, in how best to utilize the software. I then proceeded to develop their standard component, title block, and template libraries. I was later given design & production responsibility for various projects, both in standard and semi-custom single family homes.

Responsibilities:

- Development of construction drawings, and details for client review in both 2D & 3D
- Creation and maintenance of stock plans, as well as development of 3D models.
- General Office duties including filing, documentation, and correspondence with both customer care and contractors
- Drafting of standard contract purchases, including changes due to addendums, final checks and codes checks.
- Development and design of building, and built-in details
- Responsible for development of office standard components/templates and all other Revit based needs.

Work Experience Cont'd

ARCHITECTURAL DESIGNER - OASIS FINE HOMES LTD. - Feb '03 – Jan '05

Started in February '03 as second of two designers under a design manager, quickly developed skill and aptitude in Revit (self taught). I proceeded to develop standard component and title block libraries. I was later given design & production responsibility for the companies "Custom" projects, both in BC and locally.

Responsibilities:

- Development of construction drawings, and details for client review in both 2D & 3D
- Design and development of custom homes, and redevelopment of stock models.
- General Office duties including filing, documentation, and correspondence with both clients and contractors
- Drafting of standard contract purchases, including changes due addendums, final checks and codes checks.
- Development and design of building details
- Responsible for development and maintenance of standard components/templates

ARCHITECTURAL TECHNOLOGIST – RICHARD LINDSETH ARCHITECTURE - Sept '01 – Feb '03

This was my first job out of BCIT. It was an architectural firm focused on high-end residential in Calgary. As a Jr. Technologist I was given lots of detail drawings and file maintenance duties. My skills in Archicad helped me expand my role to 3D modeling for presentation. I learned a lot about high end design and client relationships from this job.

Responsibilities:

- Development of construction drawings, and details for client review in both 2D & 3D
- Involvement in the design and development process for custom homes
- General Office duties including filing, documentation, and correspondence with both clients and contractors
- Development and implementation of company 'standard' final check list and codes check list
- Development and design of building details as advised by Sr. Architects

Contract work

Private Client - Started April '08

A local developer and previous contact from Oasis Homes Ltd. contacted me to work on an infill project in Calgary's desirable Windsor Park area. Project is to design and submit DP plans for a new home on a prestigious corner lot.

Responsibilities:

- Development of presentation drawings, and images for client review/submission, including both 2D and 3D hard and soft copies
 - General organizational duties including, documentation, and correspondence with both clients & the city of Calgary
 - Investigation of local contextual by-laws and caveats on property.
 - Consultation w/ the city and community association about development and building req'ts
- April '08 – Present

Ellergodt Design - Started in Sept '03

Responsibilities:

- Development of presentation drawings, images and videos for client review/publication, including both 2D and 3D hard and soft copies as well as some "Rendered Scenes" and "Video Walk-thru's"
- General organizational duties including, documentation, and correspondence with both clients and Mr.Ellergodt
- Ongoing development of templates and title blocks as well as basic "Tutoring" for Mr.Ellergodt in Revit.

Sept '03 – Present
